

G.E.C.

TELEVISION AND ALL-WAVE RADIO RECEIVER

An instrument affecting both technical reception of television programs and a world-wide choice of sound broadcast stations. For the listener who is able to enjoy the opportunity of entertainment provided by television who gives also, the full dual channel fidelity, either by its picture quality or by its (stereo) reproduction. A most three-way radio receiver, the perfection of sound quality, the simplicity and stability of control, and the beautifully proportioned, semi-enclosed cabinet design.

A 12" OSCAR picture tube is incorporated, providing a remarkable degree of brightness and definition that can be appreciated even in a light room. Mirror viewing is employed with a front-viewed screen of the highest quality.

Catalogue No. B.T.8121
