# Baird Television Sets and Kits

Baird Television Receiver is manufactured by the Shortwave & Television Corporation, owners and operators of Television Station WIXAV at Boston, now on the air with synchronized sound in conjunction with WIXAU. The Baird was especially designed to be used with the Baird Shortwave Receiver. It is the most practical and efficient Television Receiver for home use. It is extremely simple to operate. There are only three external controls; the magnet arm lever, the rheostat knob and the A-C switch. With this set, in conjunction with the Baird Shortwave Receiver, you can bring in clear pictures and programs from stations all over the country. Baird Television Receiver No. 36, complete in handsome mahogany cabinet with shadow box and lens mounted..... List Price, \$100.00

Special Experimenter's Price **\$73.50**

Television Chassis with Synchronizing Amplifier and Framing Device

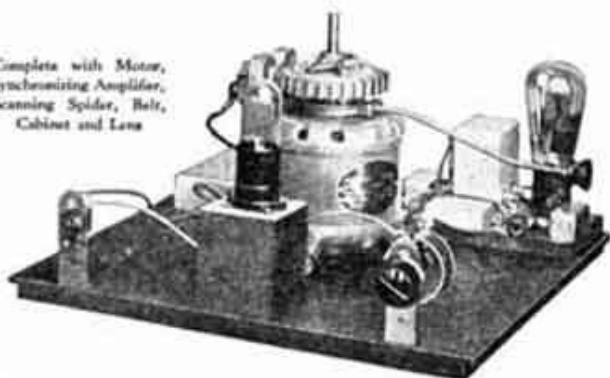

## Television Kit

The TELEVISION KIT shown includes a special Television 1/15 H.P. Motor, Synchronizing Motor and all accessories including Television synchronizing Amplifier, Lens, Television Lamp and Cabinet; in fact, everything that is necessary for complete Television reception. These parts can be assembled and put into operation in about one hour. This is the only kit which receives horizontally, the perfect method of Television reception to eliminate all distortion, and will automatically synchronize on any television signal. Can be easily adjusted for 45, 48 or 60 line pictures. This kit, in conjunction with the Shortwave Receiver, will faithfully reproduce all half-tone transmissions, as the Shortwave Receiver has been especially designed for this work, covering a frequency band of 10 cycles to 40,000 cycles where the ordinary shortwave receiver only covers a band of 100 cycles to 5,000 cycles. A transformer coupled receiver will not satisfactorily reproduce a half-tone television picture. All parts guaranteed.
